

Science Semester Project Presentation: Ocean Tides

By: Shelby Nix #4111

Sydney Simpson#4113

Courtney Cubine #4104

Semester Project Written Activity

My Semester Project Written Activity was a crossword puzzle that tested our classmates on more than just what is in our journals and since it was over ocean tides I decided to use the two main tides that we used in class, Spring and Neap tides. If you want to have another look at our written activity then you can click on the link below.

Semester Project Evaluation

For our evaluation we made a ten question test that focussed mainly on the two most popular ocean tides, Spring and Neap tides. This test asked you either true or false questions or multiple choice questions. What we really wanted to do was to explore our knowledge of ocean tides and learn more about tides than to just learn what is in our journals. If you want to look at our evaluation then you can click on the link below.

Semester Project Hands-On-Activity

For our Hands-On-Activity we decided to use Spring and Neap tides to help our classmates better understand ocean tides. We wanted to show them the relationship of the position of the moon and sun and to their effectiveness to ocean tides. To the right is a picture of us presenting our Hands-On-Activity to the class.

Other Information

If you would like to see more information about our semester project you can go to this blog 'snix.wonecks.net' or click on the link below. On this blog you can find our plan, written activity, written evaluation, and our Hands-On Activity
